## Personal summary

I have worked with cutting edge technologies while training and I am keen to be involved in helping to define the future of software applications and solutions. As a true professional I am dedicated to continual self-development, I enjoy working closely with others, and I have an eye for details and identifying problems. With a background in Business Analysis, software, applications and programming, I can function effectively in an environment which is constantly evolving due to technological advances. Right now I am looking for a suitable position with a company that places a strong emphasis on the growth and development of its employees.

## Development Skills

AWS Cloud practitioner	Python
Javascript Algorithm and Data Structure	React
CSS, JQuery	Database (SQL), Postman
Linux(Centos, Ubuntu)	Github
HTML	MS Visio, Smart sheet MS Project, Primavera pc

## Experience

### **AWS Restart Program - Amazon Cloud Practitioner**

September 2020 – Present

I trained as a Cloud Practitioner at Generation on the Amazon Web Services Restart Programme conducted in partnership with Amazon, while on the programme I gained experience in the following areas:

- Networking fundamentals used on AWS projects
- Developed a computer game, Data visualization project and a web application with the python programming language.
- Used various AWS services like EC2, cloud9 and cloudWatch to deploy projects online
- Worked with Putty and Linux CentOS to manage project files, project security and networking
- Version control with Git and Github when developing project
- Advanced MySql techniques to store projects information

### **TechReturners - Software engineer**

September 2019 - January 2020

I trained as a front end and back end Software engineer at TechReturners, where I did the following:

- Utilized HTML, CSS, JavaScript and React to develop various applications such as a productivity To-do app and an online charity software to help catalog, arrange and present Item
- Utilized postman to test developing and finalized project
- Utilized MySQL to store projects information before deploying it online with AWS

#### **Code First Girls - Software engineer**

February 2019 – April 2019

I was a Ambassador and programme participant at Code for Girls, a national initiative created to increase the numbers of women working in technology through the provision of courses in HTML, CSS, JavaScript, jQuery, Git, GitHub collaboration, and more (front-end programming).

#### **Talk2 Solicitors - *Customer care representative***

January 2018 - April 2019

- Worked to meet customers' needs
- Was the first point of contact for customers complaints
- Resolved customers problems and complaints and following up with cases

#### **Almond Media - Business analyst intern**

June 2016 – February 2018

During my time at Almond Media, I effectively and efficiently completed several projects. This included the development of websites and mobile applications for the Hospitality and Catering industry, Fashion industry and Education sector. I also advised clients on their social media strategy for Facebook, Instagram, and Twitter, developing social media campaigns. I gained experience in using both the agile (scrum) and waterfall methodology. Here are some of my responsibilities;

- Worked under pressure to meet stakeholder's requirements.
- Mitigated issues between developers and stakeholders
- Worked to Identifying and mitigating risks
- Had to coordinate teams to meet a projects deadline
- Leading and managing various projects
- Logging and tracking issues until it is resolved

#### **Private Tutor at Emmanuelle Education Services**

September 2015 - June 2016

Emmanuelle Education Services is a private tutoring company that provides educational support and training to primary school and high school students.

While at Emmanuelle Education Services I tutor students in Maths and English, reviewed students homework, assisted in revision planning and exam preparation. I gained transferable communicaiton skills and learnt how to simplify concepts.
